SUMMARY

Skilled in React.js/Next.js and full-stack development, with 2+ years of experience, Specializes in crafting responsive, user-centric interfaces and optimizing performance. Solid understanding of backend technologies such as Node.js, Express, and MySQL, complemented by a knack for troubleshooting and optimizing code for performance and usability. Seeking to leverage expertise in frontend development and full-stack proficiency to contribute effectively to a dynamic development team.

TECHNICAL SKILLS

Languages: C/C++, JavaScript, HTML/CSS, TypeScript

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Socket.io, Redux

Developer Tools: Git, Docker, AWS, Figma, VS Code

Database & Backend as a Service: MYSQL, Supabase, Firebase

EXPERIENCE

Software Developer

Letmegrab E-Platform Pvt. Ltd

May 2023 – Present

Surat

- Planned, Prepare Sprint Estimation, developed, tested, and maintained web applications
- Architected and implemented React.js for new Seller and Admin dashboards; enhanced user experience, reducing page load
- Developed Next.js structure for User panel with adaptive design
- Worked well independently and supported front-end team
- Discussed and implemented add products with variants, managed brand and seller registrations, and other flows with the team

Front-End Developer (JS)

Avatari Infotech

Jan 2022 – April 2023

Surat

- Implemented registration, login, and landing page with API call
- Fixed bugs and utilized Context API and Redux for state management
- Integrated protected and public routes to manage user security
- Optimized app performance using React Suspense, lazy loading, API optimization, and more

Customer Service Representative, Translator

Concentrix Service India Pvt. Ltd.

Oct. 2021 – Mar 2022

Gurugram

PROJECTS

Seller Panel | *React.js, Express.js, Shadcn UI, Recoil, React Hook Form, Zod, MySQL, React Query, React Table*

- Collaborated with the team to design and implement the seller panel
- Developed features like adding products, managing brands, and handling registration flows
- Leverage React Query for data fetching and caching, minimizing server load and improving performance
- Built APIs for seller registration and other relevant functionalities

User Panel | *Next.js, Redux, Adaptive Design, Shadcn UI, React Hook Form*

- Enhanced user experience with an intuitive and adaptive design that rivals leading e-commerce platforms like Ajio and Flipkart
- Implemented secure dynamic product filtering with encrypted URLs
- Develop and implement 'Add to Cart' functionality for both the backend and front end. Ensure that items added to the cart before login are transferred to the user's cart after login
- Implemented continuous delivery using TravisCI to build the plugin upon a new release

- Supported the front-end team

Admin Panel | *React.js, Recoil, React Table, Chat.js, React Query*

- Implement the verification process of the registered seller, add product approval, etc
- Implemented permission-based access to the modules
- Used React Query and other approaches to improve the performance of the application
- Encrypt and decrypt data between the frontend and backend. Encrypt data before sending it from the frontend, and decrypt it after receiving it on the backend

Client Management | *Next.js, AWS Amplify Cognito, Express.js, MongoDB, Git*

- On the client side, implement AWS Amplify and Cognito for the login and sign-up process. Integrate this with a database to store user data, distinguishing between verified and non-verified users
- On the client side, implement AWS Amplify and Cognito for the login and sign-up process. Integrate this with a database to store user data, distinguishing between verified and non-verified users.

Chat Application (Personal Project)| *Next.js, Shadcn UI, Express.js, Socket.io, MySQL, Sequelize*

E-Commerce (Personal Project)| *Next.js, Shadcn UI, Express.js, MySQL, Sequelize, React Query, Wizard*

Complex Blog App (Personal Project)| *Next.js, Express.js, MySQL, Sequelize*

- Develop a chat app supporting group and one-to-one messaging with real-time updates, user authentication, and secure data management
- Build an e-commerce platform with product listings and add-to-cart functionality, featuring user-friendly navigation and secure backend processing
- Create a blog platform where users can like, follow, and comment on posts, with a smooth user interface and robust backend for data management

EDUCATION

Mansarovar Global University

Master of Computer MCA

Bhopal

Sep. 2020 – June 2022

IEC Collage of Engineering & Technology

B.Tech

Greater Noida

Aug. 2015 – May 2019
